# The Nankang Story

## Over 60 Years of Industrious Work, all Dedicated to Motoring Safety

Nankang is proud of our quality products produced over the years. Yet we never cease to pursue excellence in both our R&D and manufacturing processes.

Nankang Rubber Tire's heritage runs deep; having the longest history among the tire manufacturers in Taiwan. For over 60 years, guided by our corporate motto, "Integrity, Pragmatism, and Innovation", we have persisted in creating performance and growth. In response to increasingly discerning market demands, we have striving aggressively towards our goals of "product innovation with R&D, differentiation from competition, product quality upgrading, customer satisfaction, after-sale service and professional management," in order to offer more and more innovative products.

## Over 60 Years of Honour and Recognition, Winning Numerous Awards with our Effort in R&D

Over the past 60 years, our continuous efforts in keeping up with the advancement of technology and product quality control have proven to be fruitful not only in developing many innovative and durable products, but also bringing us numerous global awards in Quality Assurance.

## Over 60 Years of Business Splendor, High Time to Turn a New Page

Nankang Rubber Tire's corporate logo has been in use for more than 60 years. Facing increasingly fierce competition from the global tire industry and considering the trend of corporate reforms, in 2010 Nankang embarked upon a review of its corporate identity system "CIS". Through this new project, we aim to build a new Nankang Tire brand image, of world standard. Being able to keep up with the times, the company will proudly move on to the next splendid century of its corporate history.

## Mastering the Colourful World Stage with a New CIS

A passionate yet steady symbol, the , represents Nankang Rubber Tire's sustainable business philosophy, and her corporate spirit. Care for the customer is always of paramount importance.

The CIS employs a duo colour combination of red and black. The Red color expresses Nankang's corporate spirit of high passion, respect for customers, energy and vitality. The Black color highlights the strength and stability of her tire business and represents an image of generosity, grandeur, professionalism and trustworthiness.

Whether it be for cruising the highway, striding over an icescape, or conquering a dilapidated off-road track, for over 60 years, Nankang Tire has offered drivers safe innovative motoring, with a spirit as unbreakable as the tires she manufactures.

From her humble beginnings, Nankang has advanced across five continents, and covered more than 100 countries globally. From tire industry leader in Taiwan, Nankang is now steadily driving her way onto the global stage with unlimited opportunity.

# Our Commitment to the Environment

Nankang realizes the fact that we are a part of the Earth's Eco system, and so we take pride in our responsibility to provide a better environment for future generations. Our commitment is evident right through-out the manufacturing process. Our raw materials are formulated to lower pollution emissions. As such, our suppliers are required to provide raw materials which conform to all relevant internationally recognized environmental regulations.

## *Extended Tire Life for Better Value and a Better Environment*

Extending the durability of tires not only creates higher economic value for drivers, but also reduces the impact of scrapped tires upon the environment. To achieve this, Nankang uses highly structured chemical agents to lessen tread wear, and unique additives designed to slow the tire aging process. High pressure-bearing materials are applied, to enable tires to be properly inflated. While value and safety are essential to customer satisfaction, product quality and performance are never compromised.

## *Conformity to Regulations with HA (High Aromatic)-Oil Free Formula for VOC Reduction*

Nankang tire compounds are formulated to meet the European Union's regulations on environmental protection which came into force in 2010. HA-oil free compounds are used across the major portion of our product line. In addition, necessary measures are taken to reduce volatile organic compound (VOC) generation in our manufacturing, thus eliminating further pollution in the process.

## *Lower Rolling Resistance for Fuel Saving and Carbon Dioxide Emission*

Fuel consumption and carbon dioxide emissions are direct functions of a tire's rolling resistance. Lowering rolling resistance is one of the top priorities for our product development. High dispersible silica and unique cross linking agents are applied in our formula to achieve the stable integration of natural, synthetic rubber and silica, which leads to the advanced result of lower rolling resistance, less heat generation and better grip performance.

WINTER ACTIVA — SL-6

# SV-55

## ASYMMETRIC

Superior handling in cold weather is provided by the asymmetric pattern design and special silica tread compound. Three dimensional sipe improves snow handling and ice traction performance. Multi-tiered shoulders enhance gripping and shoveling ability.
